AWARD

Winner of the Artificial Intelligence Tournament – Dual Sudoku Game (in a team of two) (05/2025)
Paris-Saclay University

Raphael Leonardi

Student in Master 1 Artificial Intelligence

Currently pursuing a Master's degree in Artificial Intelligence, my goal is to specialize in the fields of Machine Learning and Artificial Intelligence in order to strengthen my skills in research and innovation.

EDUCATION

L1-L2 Double Bachelor's Degree in Mathematics and Computer Science
Paris-Saclay University
09/2022 - 06/2024

L3 Computer Science Magistère
Paris-Saclay University
09/2024 - 06/2025

M1 Artificial Intelligence
Paris-Saclay University
09/2025 - Now

INTERNSHIPS AND PROFESSIONAL EXPERIENCE

Supervised Research Project
INRIA Saclay, GRACE team
01/2025 - 05/2025
Internship carried out within the GRACE research team at the INRIA research laboratory under the supervision of researcher Christophe Levrat.

Tasks
- Exploration and understanding of zero-knowledge proof systems for cryptographic processes.
- Implementation in C of a zero-knowledge proof system using Pedersen commitments over elliptic curves.
- Discovery and use of the Pari-GP symbolic computation library in the C language.

Contact : Christophe Levrat - christophe.levrat@math.cnrs.fr

End-of-year internship
INRIA Saclay, GRACE team
05/2025 - 07/2025
Internship carried out within the GRACE research team at the INRIA research laboratory under the supervision of researcher Christophe Levrat.

Tasks
- Exploration and understanding of error-correcting codes such as Reed-Solomon and Reed-Muller.
- Implementation of the post-quantum encryption algorithm HQC.
- Analysis and understanding of a scientific paper presenting the implementation of an algorithm.
- Implementation of algorithms for error-correcting codes and polynomial computations from scratch in the C language.
- Exposure to advanced cryptography presentations, including elliptic curves and isogenies.

Contact : Christophe Levrat - christophe.levrat@math.cnrs.fr

Generative AI Expert
Outlier
01/2025 - Now

Tasks
- Training of generative AI
- Generative AI Testing
- Correction of other Outlier contributors.
